

Mesa Panels

We specialize in Electric Motor Control. Providing Custom Solutions to your high energy cost problems

Wireless information and Control

- Industrial Automation Equipment
- TouchScreen Industrial Computers
 - Predictive Maintenance
 - Analysis & Reporting
 - Monitoring
 - Remote Monitoring
 - True Portability with PocketPC
 - realtime data access

Wireless Remote Control

Touch Screen Control

Features

- Industrial quality
- TouchScreen Ability to control all types of existing and new equipment
- Soft starts
- AC and DC variable speed drives
- Magnetic starters & controls

Networks

Streamline your mill with our computerized networks. Increase efficiency and get rid of the headache of doing the math, let the computer do it! With one touch of a button, the saw head will lower to a preset depth. You don't have to do it manually and there are none of the usual fine adjustments required when doing it by eye.

Power Factor Correction

Reduces your monthly electric bill through higher electrical efficiency, while being better for the environment.

Custom Panel Building

Power Management

Increases the efficiency of your plant through automated switching and sequencing, as well as load limits and simplified control.
